

MICT Business: Asset Management

IT asset management is a critical practice in today's technology-driven world. From tracking computers and mobile devices to monitoring virtual assets and software licenses, the management process has become increasingly complex. Traditionally, businesses relied on manual inventory updates and spreadsheet-based tracking, which often proved time-consuming and error-prone.

How can MICT help?

MICT understands the challenges businesses face in managing their IT assets effectively. With our Asset Management solution, you can automate the registration and tracking of all your assets, including desktops, laptops, mobile phones, and tablets. This comprehensive overview provides valuable insights into asset usage, relationships, and replacement schedules.

Understanding is strength, and it's the cornerstone of efficiency. MICT's Asset Management provides an automatic registration and tracking system for all your IT assets - desktops, laptops, mobile phones, tablets - all in a single dashboard. View what devices your organisation owns, their users, their interconnections, and replacement schedules. This comprehensive view not only optimizes time but also allows swift identification of potential issues and security threats.

Unlock the power of efficient asset management with MICT and gain control over your IT infrastructure.

Why choose MICT's Shield for asset management?

MICT understands the criticality of IT asset management and offers an advanced solution called MICT Shield. With our comprehensive network discovery tools, you gain complete visibility and control over your IT assets. From physical devices like machines, laptops, printers, routers, and servers to intangible assets like

software licenses, subscriptions, and vendor contracts, you can track and manage everything from a single pane of glass.

By implementing MICT Shield, you eliminate the need for manual record-keeping and reduce the risk of gaps and blind spots in your asset management process. Our solution automates essential elements, such as contract renewals, license upgrades, software patching, and installation, ensuring you stay up to date and compliant.

The benefits of MICT Shield extend beyond efficiency and compliance:

- **Cost Savings:** With a comprehensive view of your assets, you can make informed purchasing decisions, plan for end-of-life equipment, and take advantage of bulk buying opportunities or discounted warranties. You can also improve budgeting processes for clients and increase departmental accountability.
- **Compliance:** Meeting regulatory requirements is crucial for many industries. MICT Shield helps you manage and monitor permissions, access controls, and critical compliance documentation, providing peace of mind during audits and ensuring data security.
- **Security:** Unauthorised software or hardware additions pose significant security risks. MICT Shield enables you to detect and manage such additions, preventing potential vulnerabilities and ensuring a secure IT environment.

Make intelligent asset management choices with MICT's Shield solution. Streamline your operations, enhance security, and achieve compliance with ease. Trust MICT to provide you with the tools and expertise needed to effectively manage your IT assets.

Hardware and Software Solutions Provider

MICT goes beyond being a mere hardware or software reseller. We collaborate with multiple suppliers to offer tailored solutions that meet our clients' specific requirements, encompassing not only physical items but also comprehensive system designs. With a diverse range of providers at our disposal, we can ensure the implementation of the best hardware and software solutions, whether through new equipment or high-quality refurbished options, all while staying within the desired budget.

With over 20 years of experience in supporting clients, MICT excels in designing and implementing real-world solutions. Whether it's setting up an internet café suite, improving WIFI coverage, or facilitating a seamless cloud migration, our team provides free consultancy services to assist clients in designing and implementing systems that truly meet their needs.

MICT offers a wide range of solutions, including:

- Brand new servers, laptops, and desktops from leading manufacturers such as Dell, HP, and Lenovo.
- A wide range of remanufactured hardware – servers, laptops & desktops, refurbished to as close to new as is possible.

The renewal processes include external refinishing of laptops using a high-tech vinyl wrap, as well as keyboards being refinished using specialist UV print technology. Desktop computers are resprayed to a high standard.

All components are exhaustively tested using Eurosoft's 'PC builder' software, and a new copy of Microsoft Windows 10/11 Professional is installed to set the machines to an 'out of box experience'. Such is our confidence in the quality, every machine is sold with a 12-month warranty, with optional 3 and 5 year extensions!

- Renewed IT – like new, just greener!!!
- WiFi and broadband systems to enhance connectivity.
- LAN-based server and cloud solutions, including MS 365, Azure, Google, and more.
- Infrastructure requirements, including cabling, switches, and network components.
- Backup and disaster recovery services, with a focus on cyber recovery and prevention.
- Hosted phone systems for efficient communication.
- Printing solutions, ranging from single printers to larger copier solutions.
- PAT testing to ensure equipment safety and compliance.

Our expertise extends beyond product supply. We take pride in ensuring the proper installation and maintenance of all systems, providing our clients with a comprehensive and reliable solution.

Choose MICT as your trusted partner for all your hardware and software needs. Benefit from our extensive knowledge, personalized solutions, and exceptional service delivery.

Budgeting Assistance

At MICT, we recognise that every business is unique, and we prioritise tailoring our services to fit your specific needs. We understand that technology should be a tool for enhancing productivity, and for that to happen, it needs to align with the distinct aspects of your business.

Our dedicated team of engineers and consultants are here to support you in gaining a deeper understanding of your current IT budget allocation. By comprehending your organisation and its goals, we

can provide guidance on future decision-making, identifying opportunities for cost optimization and efficiency enhancements. Whether it's determining necessary upgrades or replacements, forecasting future expenses, sourcing the best vendors, auditing subscription services and leasing agreements, or any other related tasks, our team is equipped with the expertise to assist you.

Our aim is to empower you with the knowledge and insights necessary to make informed budgeting decisions. We will work closely with you to uncover areas where spending improvements can be made, and costs can be minimized or eliminated. With MICT's engineers and consultants by your side, you can confidently navigate the budgeting process, ensuring that your technology investments align with your business objectives.

Let MICT be your trusted partner in achieving financial efficiency and maximizing the value of your IT budget.
