

MICT Business: Printing solutions

If your business is still limited to basic printing functionalities like A4, A3, black and white, colour, and simple scanning options, you're

missing out on the transformative potential of Document Management and enhanced security.

With powerful OCR technology, you can analyse the content of your documents and automatically distribute them to relevant departments or individuals within or outside your organization. Integration with applications such as Sage or Salesforce allows for seamless workflows, automating paperwork, approvals, feedback, digital signatures, and archiving. This streamlined process saves significant time and eliminates the risk of sending documents to the wrong recipients or using outdated versions.

At MICT, we collaborate with various independent print solution providers to ensure you have access to the best and most cost-effective printers, photocopiers, and advanced features. From fob security systems that replace user pins to central dashboards that provide a comprehensive overview of your printing infrastructure, we strive to support your network and offer a seamless, single point of contact for all your printing needs.

Are you paying too much for your printing costs? Our team can evaluate your current printing setup and provide recommendations to optimize your printing expenses without compromising on quality or efficiency. Don't miss the opportunity to enhance your printing capabilities while reducing costs.
